GAVRIEL SADIQ

Full Stack Web Developer (MERN) | AI-Assisted Web Development

Jhelum, Pakistan | gavisadiq1122@gmail.com | +92 3095242002

Portfolio: gavriel-sadiq-portfolio.netlify.app | GitHub: github.com/sadiqgavvi-gif | LinkedIn: linkedin.com/in/gavriel-sadiq

PROFESSIONAL SUMMARY

Full Stack Web Developer and Software Engineering graduate who builds and deploys complete web applications on the MERN stack (MongoDB, Express.js, React.js, Node.js), using AI-assisted development with ChatGPT, Claude, Codex, Google Antigravity, and Gemini to ship features faster. Delivered an AI-powered interview platform, a real-time chat application, and a Chrome extension, covering secure JWT and Google OAuth authentication, REST APIs, Socket.io, Docker, and CI pipelines. Works in VS Code and Google Antigravity with clean, well-organized project file and folder structure. Ready to contribute from day one in an entry-level Frontend, Backend, or Full Stack role, remote or on-site.

TECHNICAL SKILLS

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design
Backend: Node.js, Express.js, REST APIs
Database: MongoDB (Mongoose), MySQL
AI Development Tools: ChatGPT, Claude, Codex, Google Antigravity, Gemini
Authentication & Security: JWT, Google OAuth, bcrypt Password Hashing, Helmet, CORS, Rate Limiting
Real-Time & Integrations: Socket.io, OpenAI API, Web Speech API, Third-Party API Integration
Tools & DevOps: VS Code, Google Antigravity, Git, GitHub, GitHub Actions (CI), Docker, Netlify, Vercel
Core Concepts: AI-Assisted Development, Project File & Folder Structure, OOP, Component-Based Architecture, CRUD Operations, Problem Solving
Spoken Languages: English, Urdu

PROJECTS

SmartHire — AI-Powered Interview Preparation Platform | Live Demo | GitHub

Tech Stack: *React 19, Tailwind CSS, Node.js, Express 5, MongoDB, Mongoose, OpenAI API, Recharts, Docker, GitHub Actions*

- Built and deployed a full-stack interview preparation platform offering Technical, Behavioral, and Situational practice, plus a voice-enabled mock-interview mode using the Web Speech API.
- Designed a fault-tolerant three-tier AI evaluation pipeline (OpenAI API, Python heuristic fallback, built-in Node.js evaluator) with a guardrails layer that caps scores for short, off-topic, or low-effort answers.
- Implemented secure authentication with bcrypt-hashed passwords, Google OAuth, short-lived JWT access tokens, and rotating httpOnly refresh tokens with silent session renewal; hardened the API with Helmet, CORS, and per-route rate limiting.
- Created a Recharts analytics dashboard tracking scores and session history; containerized the app with Docker and set up a GitHub Actions CI pipeline that tests the frontend and backend on every push.

Chat App — Real-Time Messaging Platform | GitHub

Tech Stack: *React, Tailwind CSS, Node.js, Express, MongoDB, Mongoose, Socket.io, JWT*

- Developed real-time one-on-one and group messaging with Socket.io, including instant delivery, typing indicators, online presence, and sent/delivered/read receipts.
- Added reply, edit, and delete-for-everyone message actions, image, file, and voice-note attachments, group admin controls, block/unblock, and per-chat unread counts.
- Secured all routes with JWT authentication and built a responsive React + Tailwind CSS interface with persisted dark mode and React Context state management.

MintList — Smart Bookmark Manager (Chrome Extension) | GitHub

Tech Stack: *HTML5, CSS3, Vanilla JavaScript, Chrome Extensions API (chrome.storage)*

- Turned the Chrome new-tab page into a drag-and-drop bookmark board system with a global command-palette search (Ctrl/Cmd+K).
- Persisted boards, links, layout, and settings with chrome.storage.local; added wallpaper theming, favicon fallbacks, URL blurring, and incognito link opening for privacy.

Restaurant Management System

Tech Stack: *HTML5, CSS3, Vanilla JavaScript*

- Built a responsive order and menu management interface with CRUD menu management, end-to-end order tracking, and real-time order-status updates using modular UI components.

EDUCATION

BS Software Engineering — PMAS Arid Agriculture University, Rawalpindi **2022 – 2026**
Final Year Project: SmartHire — AI-Powered Interview Preparation Platform

Intermediate in Computer Science (ICS) — Degree College, Jhelum **2020 – 2022**

Matriculation (Computer Science) — M.A Jinnah Grammar High School **2018 – 2020**
