GAVRIEL SADIQ

Software Engineer | Full Stack Developer (MERN)

Jhelum, Pakistan | gavisadiq1122@gmail.com | +92 309 524 2002
Portfolio : gavriel-sadiq-portfolio.netlify.app | GitHub : github.com/sadiqqgavvi-gif | Linkedin : linkedin.com/in/gavriel-sadiq

PROFESSIONAL SUMMARY

Software Engineering graduate specializing in the MERN stack (MongoDB, Express.js, React.js, Node.js), with project experience spanning AI-powered interview evaluation, real-time messaging, and browser-extension development. Builds responsive, component-based UIs in React and Tailwind CSS, backed by secure REST APIs, JWT authentication, and optimized MongoDB/Mongoose data models. Experienced integrating the OpenAI API and Socket.io for real-time features, with grounding in object-oriented programming and problem solving. Seeking entry-level Software Engineer, Frontend, Backend, or Full Stack Developer roles.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3
Core Concepts: Object-Oriented Programming (OOP), Component-Based Architecture, CRUD Operations, Problem Solving
Frontend: React.js, Tailwind CSS, Responsive Web Design
Backend: Node.js, Express.js
Database: MongoDB, Mongoose, MySQL
Authentication & Authorization: JWT Authentication, Google OAuth, bcrypt Password Hashing
APIs, Real-Time & AI: REST APIs, API Integration, Socket.io, OpenAI API
Tools & Version Control: Git, GitHub, Docker, Netlify, Vercel, VS Code

FEATURED PROJECTS

SmartHire — AI-Powered Interview Preparation Platform
Live Demo | *GitHub*

- Engineered a full-stack MERN platform (React 19/Tailwind CSS, Node.js/Express 5, MongoDB + Mongoose) delivering responsive, cross-browser Technical, Behavioral, and Situational interview practice, plus a voice-enabled mock-interview mode via the Web Speech API.
- Built a resilient three-tier AI evaluation pipeline — OpenAI API scoring with a Python heuristic fallback and a built-in Node.js evaluator — under a shared guardrails layer that caps scores for short, off-topic, or low-effort answers.
- Implemented authentication combining email/password (bcrypt-hashed) and Google OAuth, backed by short-lived JWT access tokens and rotating httpOnly refresh tokens with automatic silent session renewal.
- Designed a Recharts performance dashboard (Overall, Mock, Practice views) tracking scores, sessions, and answers on optimized MongoDB schemas; hardened the API with Helmet, CORS, and per-route rate limiting.
- Containerized the app with Docker and built a GitHub Actions CI pipeline testing the frontend and backend on every push.

Chat App — Real-Time Messaging Platform
GitHub

- Built a real-time one-on-one and group messaging app with the MERN stack and Socket.io — instant delivery, live typing indicators, and online-presence updates with no page refresh.
- Implemented read receipts (sent/delivered/read), message actions (reply, edit, delete for me/everyone), and image, file, and in-browser voice-note attachments.
- Modeled users, chats, and messages with Mongoose and Express REST routes; added group admin controls (rename, add/remove members), block/unblock users, and per-chat unread counts.
- Secured the app with JWT authentication and protected routes; built a responsive React + Tailwind CSS UI with persisted dark mode and React Context for state management.

MintList — Smart Bookmark Manager (Chrome Extension)
GitHub

- Built a Chrome extension (vanilla JavaScript, HTML5, CSS3 — no framework) turning the new-tab page into a productivity-focused, drag-and-drop bookmark board system with global command-palette search (Ctrl/Cmd+K).
- Persisted pages, boards, links, layout, and settings locally via chrome.storage.local; added favicon fallback avatars, wallpaper theming, and privacy features like URL-blurring and incognito bookmark opening.

Restaurant Management System

- Built a responsive restaurant order and menu management interface (HTML5, CSS3, vanilla JavaScript) with end-to-end order tracking, CRUD-based menu management, and modular UI components driving real-time order-status updates.

EDUCATION

BS Software Engineering — PMAS Arid Agriculture University, Rawalpindi *(2022 – 2026)*
Intermediate in Computer Science (ICS) — Degree College, Jhelum *(2020 – 2022)*
Matriculation (Computer Science) — M.A Jinnah Grammar High School *(2018 – 2020)*

ADDITIONAL INFORMATION

Actively seeking entry-level Software Engineer, Frontend, Backend, or Full Stack Developer roles — open to remote and on-site positions. Languages: English, Urdu.
